github.com/Juu316 juu316.github.io/portfolio

PROFILE

Full-stack Software Engineer experienced in building production booking, payment, and e-commerce systems. Skilled in TypeScript, React, SvelteKit, Node.js, and database architecture.

EXPERIENCE

Full-stack Developer

Dec 2025 – Present

Mon Thai Sino Group LLC / GTC Mongolia

- Led development of GTC Mongolia's booking, e-contract, and payment platform and internal staff console, serving as the primary developer in a two-person team.
- Integrated QPay and HiPay for tour bookings on global-travel.mn.
- Built an AI customer assistant, real-time chat, and an Expo mobile app with push notifications.
- Secured and migrated orchuulga.mn from compromised WordPress to SvelteKit, preserving existing URLs and SEO.

Freelance Developer

Aug – Oct 2026

Shuren Goyol / shuren.mn

- Independently built shuren.mn's e-commerce storefront and admin portal using SvelteKit.
- Integrated Wire.mn to support multiple payment methods with secure payment verification.
